

Tile Flags

Tile flags on 36" wire can be used to mark underground power lines or surveying jobs and are available in many colors.

Cost of the flags is \$7.00 plus tax per bundle of 100.
Call ahead or stop in office to purchase flags.

Spinning Jenny

Used to install high-tensile wire fences. Load the wire and set on the ground. Walk away pulling the end of the wire and it will spin, preventing your wire from tangling. Slow down gradually before stopping to prevent over-spinning and tangling. Can also be used to rewind wire in the field.

There is no rental fee for the Spinning Jenny. A signature is required on Release of Liability form. Call ahead or just stop by the SWCD office.

Seed Slinger

No cost to rent the Truax Hand Held Seed Slinger. One must sign the Release of Liability Form. Call ahead or stop by the SWCD office.

Tree Planting Bar

There is no rental fees for the tree planting bars. Call or stop by the SWCD office to add your name, address, and pick up/return dates in the logbook.

Blanket Stapler

The rental fees for each of the blanket stapler is \$10.00 per day with the plunger simply pushing the staples into the ground. If you purchase a box of staples the rental fee is waived. A box of staples cost \$50.00 plus tax. Call ahead or stop by the SWCD office to pick up either or both of the blanket staplers.

Equipment Rental

Dubois County Soil & Water Conservation District

The Dubois County SWCD maintains many pieces of rental equipment.

7' Great Plains No Till Native Grass Conservation Drill can be used to plant soybeans, wheat and legumes as well as native/warm season grasses. The benefit of this no till drill is direct seed to soil contact. This system provides higher seeding rates with native grass feeding than other boxes. It meters even the fluffiest native grass seed by continually moving the seed with the agitator and by pulling it down out of the seed box and into the native grass seed tube with the picker wheel.

The NTS26 Series No-Till Seeder is equipped with a main and small seed box, making quick work of renovating pastures, reclaiming rights-of-way, and planting food plots. Metering is ground-driven by the rear packer-roller. The NTS's tillage aggressiveness is controlled by angling the front spiked rollers. Protected by a metal wind shield, seed is directed to the ground below and gently pressed into the soil with the rear cast packer.
